Content

Regenerative energy systems will play an important role in meeting our future energy needs. Related areas range from the construction of plants and systems to business consulting to sales. The topics of sustainability and energy efficiency are not limited merely to the energy sector, however. The use of green technology in other sectors offers new opportunities, but a holistic approach will be required. Targeted learning is offered from day one with a university-wide preparatory phase to acquire basic study skills.

Perspectives

The dual focus on two core areas of competency that are of growing importance and have a broad spectrum of various applications opens a wide range of potential career options. The resulting flexible professional profile is enhanced by good language skills and experience working in both national and international contexts. In an increasingly globalized professional world, our graduates will have the ability to evaluate sustainable technical projects in accordance with current business standards.

YOU

are at the center of everything we do. We support you personally and continuously in achieving your goals. To this end, we coordinate your overarching learning successes, forms of examination and teaching and learning methods on the basis of our proven CORE principle. Everything so that you benefit from the best possible learning outcome.

The project ALLSTAY 4.0

At the end of 2018, SRH in North Rhine-Westphalia decided to use the existing experience as a starting point for a project with the aim of training foreign skilled workers and integrating them into the German economy and society in the long term due to their strong and successful internationalization strategy. Since 2017, the university of applied sciences has been able to get nearly 150 students from abroad to study in Hamm. They all received assistance regarding entry requirements and modalities and in the search for accommodation to make sure they have a great experience in Hamm. A success with model character and system.

Our Aim: Social integration and participation as well as benefits for the economy by generating highly qualified specialists.

ALLSTAY is an innovative four-stage and social integration model that aims to ensure that international students not only graduate from SRH, but also work and live permanently as professionals in Germany. The project name stands for Arrive, Learn, Live, STAY.

— **Arrive**

We get in touch with our students and support them in matters of entry-regulations and/or finding accommodations.

— **Learn**

Our students start studying promising courses accompanied by lessons in intercultural habits in Germany.

— **Live**

We help our students to learn the German language, to participate in social life and in finding friends as well as bonding with people outside the university campus.

— **Stay**

Big events and meetings with our students and business partners from the region will give our students the opportunity to take this as a useful stepping stone for a successful start in business and life in Germany.

Your application at SRH. Fast.easy.comfortable.

Simply apply online via our application portal to study with us.

The portal is called DreamApply. There you create an applicant account and apply for the study program you want. You provide all the necessary information about yourself and upload the required documents.

After we receive your application, you will receive a confirmation by email. We will check your application individually and let you know if we still need documents or if you are sure of a place. Next, you sign the study contract and send it back to us, preferably by mail. Everything else will be handled by our

Student Service department. They will inform you about the next steps and you will be enrolled.

How does that sound? And once you have taken part in our introductory week, you can start studying!

After the final admission letter your contact will only be the Student service reachable via contact: Studierendenservice.HSNRW@srh.de or here www.srh-hochschule-nrw.de/en/for-students/student-services/

The student service answers you all questions about:

- Visa application
- housing
- health insurance

and much more

The SRH ALLStay App

Which university already has its own app? We do! The SRH ALLStay App has served as the university's internal social media channel since its launch. If you are part of us, i.e. a student at SRH, you too will benefit from this app, which makes your student life easier. Receive all news about the university directly on your smartphone. Analogous to well-known social media channels, you can react to all messages - by liking, commenting or sharing them with your friends. You can also register for events, for example, with a simple click in the app. And if a question remains unanswered, you can contact us directly via chat.

Small gifts, but much more

A special highlight of the SRH ALLStay app: The more you interact and actively use the app, the more bonus points you automatically receive. Once collected, these can be converted into attractive rewards. But also special commitment from you can be rewarded with the help of the incentive system by the lecturers via a manual point allocation. points with the help of the incentive system.
